

## SHORT COURSE T2

on

### INTRODUCTION TO STEAM TURBINES

---

**Daryll Turner** received a BSME from Carnegie Mellon University in 1975 and began working for Elliott Company in Jeannette, PA. Daryll joined Champlin Refining (now Citgo) in 1987 as rotating equipment engineer. Mr. Turner joined Saudi Aramco's Consulting Services Department in Dhahran, Saudi Arabia in 1991 becoming rotating equipment specialist providing technical support to Saudi Aramco operating facilities and new projects. He served as program chairman for the Saudi Arabian Eastern Province chapter of the ASME. He joined Dresser-Rand in Olean, NY in 1998 working in the axial compressor and power recovery expander group. Mr. Turner returned to Elliott Co. in 2000 where he now works as product consultant for power recovery expanders and axial compressors. Mr. Turner is a member of ASME and coauthored a paper on using at speed balance machines to assess rotor and bearing system stability.

---

**Keith Znavich** received a BSMET from University of Pittsburgh at Johnstown in 1983. He then joined Newport News Shipbuilding in Newport News, VA as a Mechanical Engineer working primarily in submarine propulsion and auxiliary systems. Mr. Znavich was involved with such projects as the SSBN 637/ 640 Class Submarine Overhaul & Repair, and SSN 688 Class Submarine Design Engineering, Planning Yard/ Fleet Support, and Maintenance programs. He also assisted in the implementation of the shipyard's Crane Engineering, Maintenance, and Reliability program. Mr. Znavich joined Elliott Company in Jeannette, PA in 1998 as a Field Service engineer working in Technical Services, providing technical support for Elliott's many customers and operating steam turbines. He is currently the Technical Services Group Leader for steam turbines.
